

- \_\_\_ 11. Disabled and downer cattle are not allowed in the food chain and should be:
- a. Transported to a livestock marketing facility
  - b. Marketed directly to a harvest facility
  - c. Humanely euthanized on the farm under the direction of a veterinarian
- \_\_\_ 12. Over-the-counter (OTC) drug dosage can be adjusted by a veterinarian within the context of a valid-veterinary-client patient relationship.
- a. True
  - b. False
- \_\_\_ 13. It is desirable to use a disinfectant to clean needles between animals when using a modified live virus vaccine.
- a. True
  - b. False
- \_\_\_ 14. Judicious use of antibiotics dictates that efforts be made to select the best antibiotic for a particular disease treatment and it be used according to label instructions.
- a. True
  - b. False
- \_\_\_ 15. Extra- label drug use can be prescribed by:
- a. Producer
  - b. Extension staff
  - c. Veterinarian
  - d. All of the above
- \_\_\_ 16. Proper training of those who handle cattle should include which of the following topics:
- a. Understanding of the animal's point of balance & flight zone.
  - b. Proper use of handling and restraining devices
  - c. How to properly diagnose common illnesses & provide proper care
  - d. All of the above
- \_\_\_ 17. If a vaccine label gives a choice between intramuscular (IM) or subcutaneous (SQ) injection, which method should be selected?
- a. intramuscular
  - b. subcutaneous
- \_\_\_ 18. The maximum amount of a vaccine or antibiotic that should be injected in one site is
- a. 5 cc
  - b. 10 cc
  - c. 15 cc
  - d. 20 cc
- \_\_\_ 19. Beef Quality Assurance guidelines require producers to care for their animals in a humane manner.
- a. True
  - b. false
- \_\_\_ 20. If a needle is accidentally bent, it is acceptable to straighten the needle and continue using it.
- a. True
  - b. false

- \_\_\_\_ 21. A tire has the following DOT number on it – DOT U2LL LMLR 5107. When was the tire manufactured?
- a. First week of 2007
  - b. Fifty first week of 2007
  - c. Seventh week of October
  - d. Insufficient information available to determine manufacturing date
- \_\_\_\_ 22. Trailers with wooden floors should have securely fastened cattle panels or rubber mat attached to the floor to improve footing for animals.
- a. True
  - b. False
- \_\_\_\_ 23. Which of the following is not true about loading cattle onto a trailer?
- a. Sort cattle into groups based on size, sex and horns when loading them.
  - b. Heavier cattle should be loaded first in the trailer
  - c. Bulls should be put in the same compartment no matter where they came from
- \_\_\_\_ 24. Prior to loading, cattle should be checked to see if they are fit to be loaded and sold. Why is this an important part of our industry?
- a. Cattle that are not fit may be rejected at the point of sale.
  - b. Cattle that are not able to be loaded and unloaded several times will not be used for the food supply
  - c. Cattle in which the withdrawal time has not passed may have residues at slaughter
  - d. All of the above.
- \_\_\_\_ 25. Timely marketing will add value and reduce carcass defects in cull breeding animals.
- a. True
  - b. False

## TCA-BQA Training Program Checklist and Personal Contract

Please answer the following questions YES or NO as they relate to TCA's BQA program.

1. ( YES or NO ) A quality feed control program will be maintained for all feeds used on the farm. A record of all chemicals used to produce feeds will be kept. All chemicals used in the production of animal feeds will conform to product labels.
2. (YES or NO ) Only FDA approved medicated feed additives will be used in rations and they will be used in accordance with the FDA label, including administration procedure, dosage, and withdrawal time. Extra label drug use of feed additives will not be used at any time or for any reason.
3. ( YES or NO ) All individual treatments will be given in the neck region regardless of being administered subcutaneously or intramuscularly.
4. (YES or NO ) All individual treatments will strictly follow only FDA/USDA/EPA guidelines and products which cause tissue damage will be avoided.
5. (YES or NO ) Products will be administered at the lowest dosage recommended and will be administered in such a manner where there will not be more than 10 cc per IM site administered.
6. (YES or NO ) Treatment procedures will comply with either label directions or as prescribed by a veterinarian with a valid Veterinarian-Client-Patient relationship.
7. ( YES or NO ) All treatments administered extra label will be kept to a minimum and when given extra label treatments are given they will comply with the prescribed extended withdrawal time.
8. (YES or NO ) Treatments will either be recorded on a group/pen basis if given to a pen or if given to animals pre-weaning and on an individual basis if given to an animal post-weaning. Records will consist of date, pen/individual identification, product used, amount given, route and location given, and withdrawal time.
9. (YES or NO ) All cattle shipped will be checked to verify withdrawal times have been met and a release slip will be signed, dated, and sent with those cattle verifying this information.
10. (YES or NO ) Should there be any question about withdrawal periods being met, veterinarians will evaluate the treatment history against information provided by the Food Animal Residue Avoidance Databank and the animal will be subject to pass a residue screening test.
11. (YES or NO ) All records will be kept for three years and transferred with the cattle as they move from one operation to another and will also be available for inspection to determine compliance.
12. (YES or NO ) The operation will strive to prevent bruising during animal handling.
13. ( YES or NO ) Should a previous owner request performance information of cattle, all information available will be relayed back to them.
14. (YES or NO) Should there be questions regarding the TCA-BQA program, a certified trainer will be contacted to clarify any issues that are unclear.
15. (Yes or No) I have read the Producers Guide for Judicious Use of Antimicrobials in Cattle and agree to follow said guidelines

**I understand the importance of the above items in the Tennessee Cattlemen's Association Beef Quality Assurance Program and agree to follow the recommended production practices.**
